**ABOUT THE FOREST:**

The Klamath National Forest covers an area of 1,700,000 acres located in Siskiyou County in northern California and Jackson County in southern Oregon. The Forest is divided into two sections separated by the Shasta Valley and the Interstate 5 highway corridor. In the mountains to the west, the terrain is steep and rugged while the east side has the relatively gentler, rolling terrain of volcanic origin. With elevations ranging from 450 to 8,900 feet above sea level, the Forest is one of America's most biologically diverse regions, situated in a transition region between the hotter and drier areas of the south and the colder and wetter locale of the north.

This central position of the Klamath in relation to the Cascades, Sierra Nevada, Coast Range and the Great Basin has fostered complex climatic patterns and led to an unparalleled diversity of plant life found nowhere else in California. More species of conifers live near or in the Klamath's Marble Mountain and Russian Wilderness Areas than anywhere else on earth. An astounding 17 conifer species co-exist within one square mile! The Forest is also home to one plant that lives nowhere else on earth, the Siskiyou Mariposa Lily.

The program of work for the Forest is centered on the restoration of fire adapted ecosystems. We have an active and strongly integrated vegetation management and fuels program that works to protect communities, infrastructure and critical wildlife and fisheries habitat. We work with local communities, Fire Safe Councils, and interested groups and individuals in developing projects using Healthy Forest Restoration Act authorities. In 2010, the Forest was honored to be recognized as having treated the greatest amount of hazardous fuels reduction acres in the Pacific Southwest Region.

The appropriate management of naturally occurring wildfire across the Forest is also an important program component. The Klamath is known as a leader in using wildfire to benefit landscape conditions as well as having a highly skilled and experienced fire suppression workforce.

The Forest includes all or part of five wilderness areas: Marble Mountain, Russian, Trinity Alps, Red Buttes and Siskiyou. Trailheads are numerous and hikes range from easy to arduous. There are 200 miles of river system for rafting and 152 miles of wild and scenic rivers in the Forest. The Forest has 28 campgrounds, and world-class hiking, fishing and wildlife viewing. With the Klamath, Salmon, and Scott Rivers meandering from one end of the Forest to the other, recreationists have found a playground that offers virtually everything (except crowds) to the outdoor enthusiast.

The management of area streams and rivers, and range, botanical, heritage, cultural and mineral resources rounds out the active and interesting programs included on the Klamath.

More information on the Klamath National Forest is on our website: <http://fs.usda.gov/klamath/> .
